

Overview

A key performance indicator (KPI) is a metric an organization uses to determine how well it meets its strategic goals and objectives. This means different businesses have different KPIs depending on their respective performance criteria or priorities. At the same time, the indicators usually follow industry-wide standards.

Organizations must know how to determine which metrics can work as their key performance indicators. Without these indicators and the guidance they provide to businesses, it's nearly impossible for them to achieve their full potential.

Objectives

"KPIs: Principles and Fundamentals" workshop aims at spreading awareness, good knowledge, principles on KPIs. Participants will be enabled to develop, monitor, measure, and evaluate the effectiveness of the KPIs that will measure and track their business objectives.

Course Outlines

- Terms and Definitions
- Basic Data Analysis
- Introduction to KPIs
- Business Objectives
